NH DHHS COVID-19 Update – June 22, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Monday, June 22, 2020, DHHS announced 15 new positive test results for COVID-19. There have now been 5,558 cases of COVID-19 diagnosed in New Hampshire. Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, all are adults with 60% being female and 40% being male. The new cases reside in Hillsborough County other than Manchester and Nashua (4), Rockingham (3), Merrimack (1), and Strafford (1) counties, and in the cities of Manchester (4) and Nashua (1). The county of residence is being determined for one new case.

Five new hospitalized cases were identified for a total of 558 (10%) of 5,558 cases. One of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Most of the remaining cases have had close contact with a person with a confirmed COVID-19 diagnosis or are associated with an outbreak setting.

DHHS is adding new testing data to the daily update to incorporate results from the serial surveillance testing program at long-term care facilities, which began last week. Previously, the data reflected the number of unique individuals tested. The new data reflects the total number of tests run each day, including repeat testing for individuals. As a result of creating and conducting quality assurance on the separate data sets, the newly-extracted data has led to revisions in the number of person-based test results. The data below represents data on individuals tested and total test volume as of June 22 at 9:00 am.
