NH DHHS COVID-19 Update – October 11, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Sunday, October 11, 2020, DHHS announced 55 new positive test results for COVID-19, for a daily PCR test positivity rate of 0.8%. Today's results include 32 people who tested positive by PCR test and 23 who tested positive by antigen test. There are now 685 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are fourteen individuals under the age of 18 and the rest are adults with 55% being female and 45% being male. The new cases reside in Rockingham (16), Hillsborough County other than Manchester and Nashua (11), Strafford (10), Merrimack (5), and Belknap (1) counties, and in the cities of Manchester (6) and Nashua (3). The county of residence is being determined for three new cases.

Two new hospitalized cases were identified. There are currently 22 individuals hospitalized with COVID-19. None of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or are associated with an outbreak setting.

DHHS has announced one additional death related to COVID-19. We offer our sympathies to the family and friends.

- 1 male resident of Hillsborough County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 9,143 cases of COVID-19 diagnosed with 752 (8%) of those having been hospitalized.
